Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to articles of isocyanate functional polymers, classified in class 606, subclass 53.
- II. Claim 21, drawn to diketene acetal functional polymer, classified in class 528, subclass 354.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions rely on different materials. The first group is lysine isocyanate functional. The second group is diketene acetal functional. These two functional groups are dissimilar. Secondly, the first group of claims are drawn to surgical articles while claim 21 is drawn to a composition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mark Farber on 1/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
